What This Program Provides

Access to the most experienced and expert cardiac centers for the patient's condition. Physicians, surgeons, and hospitals have been carefully evaluated using more than 1800 state of the art quality criteria.

Help patients find the most expert physician and hospital for their conditions.

Assistance with referrals to physician and surgical specialists that are renown for their expertise in diagnosing and treating patients with specific conditions.

Descriptions and evaluations of new treatment options.

Lists of questions for patients to ask their physicians and information to help evaluate their responses.

If desired, assistance with lodging and transportation when the patient needs to travel to another city for consultation or treatment.

If desired, we offer hands on patient support and care management pathways.
