What This Program Provides --

- ☑ Access to the most experienced and expert transplant centers for the patient's condition. Physicians, surgeons, and hospitals have been carefully evaluated using more than 750 state of the art quality criteria for each type of transplant.
- ☑ Assistance with referrals to physician and surgical specialists that are renown for their expertise in diagnosing and treating patients with specific conditions. Often times a transplant is not necessary: The patient may benefit more from another type of treatment.
- ☑ Descriptions and evaluations of new treatment options.
- ☑ Lists of questions for patients to ask their physicians and information to help evaluate their responses.
- ☑ If desired, assistance with lodging and transportation when the patient needs to travel to another city for consultation or treatment.
- ☑ If desired, we offer hands on patient support and care management pathways.
